In House Safety Meeting

On Thursday, October 22, 2020, we held a safety meeting with all employees of BTD Enterprises, LLC. In this meeting, we went to the SD811 website and reviewed the One Call Laws and Statutes and the Operations Manual for the excavator. After reviewing this information, we had an in-depth conversation about the importance of following the One Call guidelines and rules and what kind of consequences could arise if not followed properly. We thoroughly went over how to read locate markings and what they mean and why they are there. We will continue to have monthly safety meetings and will review One Call guidelines and rules to make sure every employee fully understands them. All attendees of the meeting have signed below confirming their attendance and understanding of the material discussed.
