Our investigation at this time indicates our insured Zacharias Construction Inc. did cut a cable on 8-22-19.

The line was repaired by Midcontinent Communications (Midco).

Our insured was advised by Midco they were not going to bury the line until after the street work was completed. Midco laid the repaired line above the ground and advised our insured they would be able to drive over the line and could continue working.

The line then was damaged a second time.

Based on the information we have at this time we would agree to pay you for 8-22-19 [REDACTED] for [REDACTED]. These were the dates of the initial cut line.

The remainder of your claim will need to be addressed by Midco due to the temp repairs they made causing a second outage by placing the line above the ground.

[REDACTED]

Let me know if you have any questions.

Thanks.
