RE: Claim # 4020217532
 Insured Prunty Construction Co
 Date of loss August 22, 2019

Dear Ms. Rempfer-Brown and Roger French:

I am in receipt of Roger French's email of February 24th. Please be advised that the photo that I have is the only photo that we are aware of. If you have a photo that proves your case please forward for our consideration.

The insured did pot hole two feet down and found no line. They then use the excavator to clear the top 2 feet so they can continue to pot hole to locate the Midco line. They had no reason to believe that the Midco was not within the marked area; therefore, there was no need to call in a new locate. Most lines are below the 2 foot mark so not a surprise they did not locate it.

Unless you have evidence to prove that Prunty Construction Co Inc. is negligent in this incident, we stand by our denial.

Sincerely,

United Fire & Casualty Company
